

MIXED VEGETABLE FATTY ACID OIL

Reference: - FFA-MT1

Composition:- Vegetable acid oil with traces of methanol (NO ADR)

PROPERTIES

Better calorific value
Better burning capacity
High flash point
Easy handling due to low pour point.

PRACTICAL BENEFIT

Cost effective
Easy to store
Better as boilers or furnace fuel
Low density
Low sulphur and carbon content, so lower pollution
Better viscosity and dark brown colour.

SPECIFICATION

Calorific value 9.000kcal/kg
Moisture/impurities 0.1%
Density max 920 kg
Flash point 95°C
Sulphur content max 1%
Sediments 0.10%
Methanol 2%
Colour Dark brown

Application : Boiler, furnace / electric power plants.
